

SUBSTITUTE ABSTRACT OF THE DISCLOSURE

A pouring attachment (3) in the form of a closure for a container (2), such as a paint can, includes an annular ring or rim (4) and a lid (5) hinged to the rim (4). The container with closure (1) includes a pouring spout (5a) which provides for easy dispensing of the contents of the container (2). The pouring attachment (3) includes an interacting sealing arrangement (16, 17, 22, 23, 24, 25, 26 and 27) to facilitate sealing and resealing of the container, including a spout cover (6) for the pouring spout (5a), and a camming surface (28) to enable the lid (5) to open to one of two open positions, including a first position which facilitates drainage of the container contents back into the can. The container with closure includes optional handle (12) and tamper-evident sealing means. Containers incorporating such pouring attachments are also disclosed.
